

Sherington Science Links

At Sherington we actively develop links with organisations and individuals beyond our own school to enhance provision and the quality of science teaching and learning.

In recent years we have developed links with: The John Roan Secondary School, Widehorizons, Royal Greenwich Teaching Schools Alliance and STEMNet.

This has enabled us to:

- Share good practice
- Promote scientific enquiry
- Encourage cross curricular links
- Make science visible within the school
- Ensure accessible resources
- Monitor and improve teaching and learning
- Improve assessment procedures
- Participate in CPD
- **Engage in networks beyond** our school

The John Roan Science Workshop

We make every effort to provide our staff with high quality, specialist local professional support to help them develop and impact positively on learning in science.

Recent Science PDM – developing enquiry based learning in Primary Science lead by STEMNet
