

SHERINGTON PRIMARY SCHOOL SUPPORTING CHILDREN WITH MEDICAL CONDITIONS POLICY

Our Vision Statement

Sherington Primary School is an inclusive community. We place the child at the centre of all that we do. We strive to maintain the highest standards in an environment that is creative, stimulating, inspiring and enabling.

- Aspire** Motivating and exciting all to become lifelong learners
- Believe** Developing the skills and confidence to foster self-belief
- Create** Engaging all learners through creative practice and personal reflection
- Achieve** Experiencing success and embracing future challenges

Our Aims are:

- To place the child at the centre of all that we do.
- To foster positive, supportive relationships with families and the wider community.
- To provide models of excellence drawing on the expertise of our highly skilled team.
- To provide an enquiry based curriculum, that promotes the values of resilience, adaptability and perseverance.
- To promote lifelong learning through developing a whole school culture of challenge and growth.
- To prepare learners for a future in an increasingly interconnected global economy.

Appendix 1: Being notified a child has a medical condition	9

1. Aims

This policy aims to ensure that:

- Children, staff and parents/carers understand how our school will support children with medical conditions
- Children with medical conditions are properly supported to allow them to access the same education as other children, including school trips and sporting activities

The governing board will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of children' conditions, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support children with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant children
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is the headteacher.

2. Legislation and statutory responsibilities

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting children at their school with medical conditions.

It is also based on the Department for Education (DfE)'s statutory guidance on [supporting children with medical conditions at school](#).

3. Roles and responsibilities

3.1 The governing board

The governing board has ultimate responsibility to make arrangements to support children with medical conditions. The governing board will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

3.2 The headteacher

The headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Ensure that all staff who need to know are aware of a child's condition
- Take overall responsibility for the development of IHPs
- Make sure that school staff are appropriately insured and aware that they are insured to support children in this way
- Contact the school nursing service in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

3.3 Staff

Supporting children with medical conditions during school hours is not the sole responsibility of 1 person. Any member of staff may be asked to provide support to children with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support children with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of children with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a child with a medical condition needs help.

3.4 Parents/carers

Parents/carers will:

- Provide the school with sufficient and up-to-date information about their child's medical needs
- Be involved in the development and review of their child's IHP and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP, e.g. provide medicines and equipment, and ensure they or another nominated adult are contactable at all times

3.5 Children

Children with medical conditions will often be best placed to provide information about how their condition affects them. Children should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

3.6 School nurses and other healthcare professionals

Our school nursing service will notify the school when a child has been identified as having a medical condition that will require support in school. This will be before the child starts school, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as GPs and pediatricians, will liaise with the school's nurses and notify them of any children identified as having a medical condition. They may also provide advice on developing IHPs.

4. Equal opportunities

Our school is clear about the need to actively support children with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these children to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that children with medical conditions are included. In doing so, children, their parents/carers and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

When the school is notified that a child has a medical condition, the process outlined below will be followed to decide whether the child requires an IHP.

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for children who are new to our school.

See Appendix 1.

6. Individual healthcare plans (IHPs)

The headteacher has overall responsibility for the development of IHPs for children with medical conditions. This has been delegated to the Inclusion Lead (Jo Richards).

Plans will be reviewed at least annually, or earlier if there is evidence that the child's needs have changed.

Children who have an IHP will be recorded in the MediAlert booklet.

Plans will be developed with the child's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all children with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents/carers when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents/carers and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the child's specific needs. The child will be involved wherever appropriate.

IHPs will be linked to, or become part of, any education, health and care (EHC) plan. If a child has special educational needs (SEN) but does not have an EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The governing board and the headteacher will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments
- The child's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the child's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. If a child is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the child's condition and the support required
- Arrangements for written permission from parents/carers and the headteacher for medication to be administered by a member of staff, or self-administered by the child during school hours

- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/carer or child, the designated individuals to be entrusted with information about the child's condition
- What to do in an emergency, including who to contact and contingency arrangements

7. Managing medicines

Prescription and non-prescription medicines will only be administered at school:

- When it would be detrimental to the child's health or school attendance not to do so **and**
- Where we have parents/carers' written consent

Children under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

One dose of prescribed antibiotics will be administered during the school day if four doses are prescribed in one day. Where three doses are prescribed, parents/carers are expected to administer these at home unless the child attends full wraparound care.

Before prescribed medication can be given parents/carers must meet with a member of the office team and a form completed which details how much medicine should be taken, what it is for and when the dose should be administered.

Anyone giving a child any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents/carers will always be informed.

The school will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Children will be informed about where their medicines are at all times and be able to access them immediately. Children will be accompanied to the office to receive prescribed medication.

Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to children in the school office and not locked away. A member of the office team will take this to the child immediately upon request. School phones will be used to communicate requests.

The school keeps emergency adrenalin pens and asthma inhalers to be used in emergencies. Parents/carers of children requiring these medications will sign a consent form to say that they may be given as required. The school is responsible for making sure that these medications are in date.

In exceptional circumstances, un-prescribed medicines can be administered at school. In these cases, parents/carers are required to speak to a member of office staff to discuss why the medicine is needed, for what time period and whether or not this is something the school is able to facilitate. They will be required complete a consent form. When un-prescribed medicine is administered parents/carers will be informed.

Medicines will be returned to parents/carers to arrange for safe disposal when no longer required.

7.1 Controlled drugs

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A child who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another child to use. All other controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

7.2 Children managing their own needs

Children who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents/carers and it will be reflected in their IHPs.

Children will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a child to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents/carers so that an alternative option can be considered, if necessary.

7.3 Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the child's IHP, but it is generally not acceptable to:

- Prevent children from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every child with the same condition requires the same treatment
- Ignore the views of the child or their parents/carers
- Ignore medical evidence or opinion (although this may be challenged)
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs
- If the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable
- Penalise children for their attendance record if their absences are related to their medical condition, e.g. hospital appointments

- Prevent children from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- Require parents/carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent/carer should have to give up working because the school is failing to support their child's medical needs
- Prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips, e.g. by requiring parents/carers to accompany their child
- Administer, or ask children to administer, medicine in school toilets

8. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All children's IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a child needs to be taken to hospital, staff will stay with the child until the parent/carer arrives, or accompany the child to hospital by ambulance.

9. Training

Staff who are responsible for supporting children with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to children with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the Inclusion Lead. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the children
- Fulfil the requirements in the IHPs
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

10. Record keeping

The governing board will ensure that written records are kept of all medicine administered to children for as long as these children are at the school. Parents/carers will be informed if their child has been unwell at school.

IHPs are kept in a readily accessible place that all staff are aware of.

11. Liability and indemnity

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are:

INSURER: QBE

POLICY NUMBER: Y139426QBE0124A

12. Complaints

Parents/carers with a complaint about the school's actions in regard to their child's medical condition should discuss these directly with the headteacher in the first instance. If the headteacher cannot resolve the matter, they will direct parents/carers to the school's complaints procedure.

13. Monitoring arrangements

This policy will be reviewed and approved by the governing board annually.

14. Links to other policies

This policy links to the following policies:

- Accessibility plan
- Complaints
- Equality information and objectives
- First aid
- Health and safety
- Safeguarding
- Special educational needs information report and policy
